

## Dynamic Bonus Agreement

1. All customers of SuperForex have the right to receive a Dynamic Bonus every time they make a deposit to their accounts.
2. The Dynamic Bonus can be credited to real trading accounts only.
3. The amount of the Dynamic Bonus is calculated based on the amount of the deposit as follows:

from \$100 to \$500	the bonus is 20%
from \$501 to \$1500	the bonus is 15%
from \$1501 to \$3000	the bonus is 10%
over \$3000	the bonus is 25%

4. The Dynamic Bonus shall be credited to the account automatically upon making the deposit.
5. The number of accounts for each customer is not limited. Customers may apply for the Dynamic Bonus with all of their accounts.
6. Exclusivity and compatibility: The Dynamic Bonus can be combined with the 40% Welcome. It cannot be combined with the 60% Energy Bonus, 120% Hot Bonus, Easy Deposit Bonus or No Deposit Bonus. The Dynamic Bonus cannot be combined with the Deposit Insurance Program.
7. Withdrawals and bonus cancellation: The profit over the Dynamic Bonus may be withdrawn after all Buy and Sell deals are completed. Customers agree that every time they withdraw funds from their accounts after receiving the Dynamic Bonus, SuperForex shall cancel part of the bonus. The part to be cancelled is proportionate to the amount of the withdrawal and cannot exceed the amount of the credited bonus.

7.1. The proportion is calculated based on the following:

$[(X/Y) * (\text{the amount of the Dynamic Bonus})] \text{ minus } [\text{the Released Amount}]$

Where:

X = the amount that is requested for withdrawal

Y = the current available balance in the account after the amount of the Dynamic Bonus has been deducted

7.2. The Released Amount of dollars is calculated based on the following:

1 Lot = \$1 to be withdrawn

The profit made over the bonus amount can be withdrawn without any restrictions provided that all the terms and conditions of this agreement are fulfilled. For example, you claimed the Dynamic Bonus and made a deposit of \$100 to activate it. According to the chart above, the bonus will be 20% of \$100 = \$20. In total you have \$120 on your account. Let's say you make some trades on 2 Lots and get to \$200, and you want to make a withdrawal of \$50. Let's use the formula to see how much money will be cancelled from your account:

$$X = \$50$$

$$Y = 200 - 20 = \$180$$

$$\text{Released Amount} = 2 \text{ lots} = \$2$$

$$\Rightarrow \text{The cancelled amount} = (50/180) * 20 - 2 = \$3.55$$

8. In case customer's account is in other currency, a currency conversion will be executed at company rates, i.e. the rates provided by MetaTrader 4. Currency conversion will be based on the rates at the moment of receiving your customer's request.
9. SuperForex reserves the right to cancel the Dynamic Bonus at its own discretion and without a prior notice in case of fraud activity suspicion. We strongly recommend that customers should not use the bonus funds in calculation of profit in their trading strategy.
10. SuperForex is not responsible for any consequences that may arise as a result of cancelling the Dynamic Bonus, including but not limited to Stop Out.
11. The Company reserves the right to amend or modify the Bonus Agreement terms without prior notice.
12. By applying for the Dynamic Bonus you acknowledge you have read and accepted the terms and conditions of this Agreement.
